

WHY PAPER BALLOTS IN PA?

State Law Now Requires it to Ensure a Safe, Sound, and Secure Election!

By 2018 the voting machines were already too old to repair

There were also concerns that the computers could be hacked or that the electronic systems could fail and wipe out all records of votes cast

The new machines meet very strict security requirements

Paper ballots ensure that all ballots can be accurately counted even in the face of a cyberattack or a mishap

WITH PAPER BALLOTS, YOUR VOTE CAN BE TRACKED AND AUDITED

VOTE WITH CONFIDENCE!

These changes are meant to ensure that:

Every voter will feel safe casting their ballot

The voting process is sound

All votes will be secure
